

Management Discussion and Analysis (“MD&A”)

Financial Statement Report Date – September 30, 2015

Date of this Report – November 16, 2015

As used in this quarterly report, “we”, “us”, “our”, “Energizer Resources”, “Energizer”, “Company” or “our company” refers to Energizer Resources Inc. and all of its subsidiaries. The term NSR stands for Net Smelter Royalty.

ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Management’s Discussion and Analysis of Financial Condition and Results of Operations (“MD&A”) should be read in conjunction with our financial statements included herein. Further, this quarterly report on Form 10-Q should be read in conjunction with our Financial Statements and Notes to Financial Statements included in our fiscal 2015 Annual Report on Form 10-K for the year ended June 30, 2015, filed with the Securities and Exchange Commission on September 30, 2015. Our actual results could differ materially from those anticipated by the forward-looking statements due to important factors and risks including, but not limited to, those set forth under “Risk Factors” in Part I, Item 1A of our Annual Report on Form 10-K. In addition, the foregoing factors may affect generally our business, results of operations and financial position. Forward-looking statements speak only as of the date the statement was made. We do not undertake and specifically decline any obligation to update any forward-looking statements.

Our financial statements have been prepared in accordance with United States generally accepted accounting principles. We urge you to read this report in conjunction with the risk factors described herein.

Management’s Discussion and Analysis may contain various “forward looking statements” within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, regarding future events or the future financial performance of the Company that involve risks and uncertainties. Certain statements included in this Form 10-Q, including, without limitation, statements related to anticipated cash flow sources and uses, and words including but not limited to “anticipates”, “believes”, “plans”, “expects”, “future” and similar statements or expressions, identify forward looking statements. Any forward-looking statements herein are subject to certain risks and uncertainties in the Company’s business and any changes in current accounting rules, all of which may be beyond the control of the Company. The Company has adopted the most conservative recognition of revenue based on the most astringent guidelines of the SEC. Management will elect additional changes to revenue recognition to comply with the most conservative SEC recognition on a forward going accrual basis as the model is replicated with other similar markets (i.e. SBDC). The Company’s actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including those set forth therein. Undue reliance should not be placed on these forward-looking statements, which speak only as of the date hereof. We undertake no obligation to update these forward-looking statements.

BACKGROUND – COMPANY OVERVIEW

Our company is a State of Minnesota, United States of America incorporated entity. Our fiscal year end is June 30. Our principal business is the acquisition and exploration of mineral resources. During fiscal 2008, we incorporated Energizer Resources (Mauritius) Ltd., a Mauritius subsidiary and Energizer Resources Madagascar Sarl, a Madagascar subsidiary. During fiscal 2009, we incorporated THB Venture Ltd., a Mauritius subsidiary to hold the interest in Energizer Resources Minerals Sarl, a Madagascar subsidiary. During fiscal 2012, we incorporated Madagascar-ERG

Joint Venture (Mauritius) Ltd., a Mauritius subsidiary and ERG (Madagascar) Sarl, a Madagascar subsidiary. ERG (Madagascar) Sarl is 100% owned by Madagascar-ERG Joint Venture (Mauritius) Ltd. which is now 100% owned by Energizer Resources (Mauritius) Ltd. ERG (Madagascar) Sarl holds the Molo Graphite Property. During fiscal 2014, we incorporated 2391938 Ontario Inc., an Ontario, Canada subsidiary.

We have not had any bankruptcy, receivership or similar proceeding since incorporation. Except as described below, there have been no material reclassifications, mergers, consolidations or purchases or sales of any significant amount of assets not in the ordinary course of business since the date of incorporation.

On December 16, 2014, our authorized capital was increased from an aggregate of four hundred fifty million (450,000,000) shares to six hundred fifty million (650,000,000) shares, par value of \$0.001 per share, of which 640,000,000 will be deemed common shares and the remaining 10,000,000 will be deemed eligible to be divisible into classes, series and types as designated by our Board of Directors.

Summary of Our Business

We are an exploration stage company engaged in the preparation of a commercially minable graphite deposit in the African country of Madagascar. We have an additional exploration stage interest in properties located in Madagascar, and in Canada in the Province of Québec.

Our executive offices are currently located at 520–141 Adelaide Street West, Toronto, Ontario, Canada M5H 3L5. Our telephone number is (416) 364-4911. We maintain a website at www.energizerresources.com (which website is expressly not incorporated by reference into this filing). These offices are leased on a month-to-month basis, and our monthly rental payments are currently approximately \$7,500 per month (approximately \$10,000CAD).

Further details regarding each of our Madagascar properties, although not incorporated by reference, including the comprehensive geological report prepared in accordance Canada's National Instrument 43-101 - *Standards of Disclosure for Mineral Properties* ("NI 43-101") on our Molo Graphite Property and separately our technical report on our Green Giant Property in Madagascar can be found on our Company's website: www.energizerresources.com (which website is expressly not incorporated by reference into this filing) or in our Company's Canadian regulatory filings on www.sedar.com (which website and content is expressly not incorporated by reference into this filing).

Cautionary Note

Based on the nature of our business, we anticipate incurring operating losses in the foreseeable future. We base this expectation, in part, on the fact that very few mineral properties in the exploration stage ultimately develop into producing and profitable mines. Our future financial results are also uncertain due to a number of factors, some of which are outside our control. These factors include, but are not limited to: (1) our ability to raise additional funding; (2) the market price for graphite, vanadium, gold and uranium; (3) the results of our exploration programs and metallurgy analysis on our mineral properties; (4) the political instability and environmental regulations that may adversely impact costs and operations in Madagascar; and (5) our ability to find joint venture and/or off-take partners for the development of our property interests.

Any future equity financing will cause existing shareholders to experience dilution of their interest in our Company. In the event we are not successful in raising additional financing, we anticipate that we will not be able to proceed with our business plan. In such a case, we may decide to discontinue our current business plan and seek other business opportunities in the resource sector.

During this period, we will need to maintain our periodic filings with the appropriate regulatory authorities and will incur legal and accounting costs. In the event no other such opportunities are available and we cannot raise additional capital to sustain operations, we may be forced to discontinue business. We do not have any specific alternative business opportunities in mind and have not planned for any such contingency.

Due to our lack of operating history and present inability to generate revenues, our auditors have stated their opinion in the notes to our audited financial statements in our annual report on Form 10-K and we have included in Note 1 of this quarterly report that there currently exists doubt as to our ability to continue as a going concern.

Summary of Quarterly Milestones and Future Plans

In the coming months, our company plans to pursue negotiations in respect of potential off-take agreements with graphite end users and continue to seek project financing alternatives (debt and equity). Discussions in respect of these

matters have been ongoing for the past 18 months and are planned to continue during the coming months although no assurances can be provided regarding the results of these discussions. The Company is continuing to review optimization strategies in hopes of reducing both the capital and operating costs relating to the Molo Graphite Property.

RESULTS OF OPERATIONS

We have had no operating revenues from inception on March 1, 2004 to the period ended September 30, 2015. Our activities have been financed from the proceeds of securities subscriptions.

The following are explanations for the material fluctuations/disparities during the period ended September 30, 2015 when compared to the period ended September 30, 2014:

- Mineral exploration costs totalled \$176,959 (September 30, 2014: \$1,703,126), which represents a decrease of \$1,526,167 as our company shifts from exploration to development of our Molo project. A total of \$137,229 was spent on our Molo project in Madagascar and a total of \$39,730 was spent on our Sagar project in Quebec.
- Professional fees totalled \$188,717 (September 30, 2014: \$231,897) which is a decrease of \$43,180.
- General and administrative costs are primarily as a result of operating our Toronto office, certain administrative costs in Madagascar, travel, investor relations and fees associated with our TSX listing. General and administrative costs totalled \$90,838 (September 30, 2014: \$247,035), which represents a decrease of \$156,197.
- Stock-based compensation was nil (September 30, 2014: \$404,160).
- Depreciation was \$23,599 (September 30, 2014: \$11,369).
- Foreign currency translation loss position was \$103,318 (September 30, 2014: \$49,530). This item arises due to the fluctuations in foreign currency exchange rates at the time that transactions occur in a currency other than our functional currency of US dollars and due to the revaluation of balance sheet items from foreign currencies into US dollars as of the date of the balance sheet, namely September 30, 2015.
- The change in the warrant derivative liability was a gain of \$633,506 (September 30, 2014: loss of \$501,395). This item arises since certain outstanding common share purchase warrants are considered derivative instruments as they were issued in Canadian dollars, a currency other than the Company's functional currency of the US dollar. The estimated fair value of warrants accounted for as liabilities was determined as of September 30, 2015 and are marked to market at each financial reporting period. The change in fair value of the warrant liability is recorded in the consolidated statements of operations and comprehensive loss as a gain or loss and estimated using a Binomial model.

Liquidity, Capital Resources and Foreign Currencies

As at September 30, 2015, we had cash on hand of \$736,961 and total working capital of \$214,388 excluding the subscription receipts received in advance and the non-cash warrant liability.

We hold a significant portion of its cash reserves in Canadian dollars to satisfy our non-exploration expenditures, which are mainly incurred in Canadian dollars. Due to foreign exchange rate fluctuations, the value of these Canadian dollar reserves can result in translation gains or losses in US dollar terms. If there was to be a significant decline in the Canadian dollar against the US dollar, the US dollar value of that Canadian dollar cash position presented on our balance sheet would also significantly decline. If the US dollar significantly declines relative to the Canadian dollar, our quoted US dollar cash position would also significantly decline. Such foreign exchange declines could cause us to experience losses. In addition to paying expenses in Canadian dollars, we also pay certain expenses in South African Rand, Madagascar Ariary and Euros. Therefore, we are subject to risks relating to movements in those currencies.

There are no assurances that we will be able to achieve further sales of common shares or any other form of additional financing. If we are unable to achieve the financing necessary to continue the plan of operations, then we will not be able to continue our exploration and our venture will fail.

Capital Financings

We have funded our business to date from sales of our securities. Below are our net proceeds from the last two years:

- For the year ended June 30, 2014, we raised net proceeds of \$9,559,926 through the issuance of 90,523,283 common shares and 39,312,130 common share purchase warrants.
- For the year ended June 30, 2015, we raised net proceeds of \$6,663,148 through the issuance of 40,757,067 common shares and 22,626,569 common share purchase warrants.

In addition, subsequent to the quarter ended September 30, 2015, we closed the following private placement:

On October 7, 2015, we closed our non-brokered private placement offering of 14,200,000 units (the “Units”) at a price of \$0.05CAD per Unit, representing gross proceeds of \$710,000CAD. Insiders subscribed for a total of \$50,000CAD as part of this Offering. Each Unit is comprised of one (1) common share and one-half (0.5) of one (1) common share purchase warrant (a “Warrant”), each Warrant entitling the holder thereof to acquire one (1) additional common share at a price of US\$0.07 per share until October 6, 2017.

We will require additional funding during fiscal 2016, which will likely be in the form of equity financing from the sale of our common shares. However, we cannot provide investors with any assurance that we will be able to raise sufficient funding from the sale of common shares for additional phases of exploration.

Off-balance sheet arrangements

We have no off-balance sheet arrangements including arrangements that would affect the liquidity, capital resources, market risk support and credit risk support or other benefits.

ITEM 3. - QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Not applicable.

ITEM 4. - CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

Our management team, under the supervision and with the participation of our principal executive officer and our principal financial officer, evaluated the effectiveness of the design and operation of our disclosure controls and procedures as such term is defined under Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended (Exchange Act), as of the last day of the fiscal period covered by this report, September 30, 2015. The term disclosure controls and procedures means our controls and other procedures that are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC’s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to management, including our principal executive and principal financial officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. Based on this evaluation, our principal executive officer and our principal financial officer concluded that, our disclosure controls and procedures were effective as of September 30, 2015.

Changes In Internal Control Over Financial Reporting

There were no changes in the Company’s internal controls over financial reporting during the most recently completed fiscal quarter that have materially affected or are reasonably likely to materially affect the Company’s internal control over financial reporting.

PART II – OTHER INFORMATION

ITEM 1. - LEGAL PROCEEDINGS

We are currently not involved in any litigation that we believe could have a material adverse effect on our financial condition or results of operations. There is no action, suit, proceeding, inquiry or investigation before or by any court, public board, government agency, self-regulatory organization or body pending or, to the knowledge of the executive officers of our Company or any of our subsidiaries, threatened against or affecting our company, our common stock, any of our subsidiaries or of our companies or our subsidiaries’ officers or directors in their capacities as such, in which an adverse decision could have a material adverse effect.

ITEM 1A. – RISK FACTORS

Not required under Regulation S-K for “smaller reporting companies” we hereby disclose the following:

Our business is subject to a variety of risks and uncertainties, including, but not limited to, the risks and uncertainties described below and elsewhere within this document. If any of the risks described below, or elsewhere in this report on

Form 10-K, or our Company's other filings with the Securities and Exchange Commission (the "SEC"), were to occur, our financial condition and results of operations could suffer and the trading price of our common stock could decline. Additionally, if other risks not presently known to us, or that we do not currently believe to be significant, occur or become significant, our financial condition and results of operations could suffer and the trading price of our common stock could decline. You should carefully review the risk factors noted below together with all of the additional risk factors and other information contained in our Annual Report on Form 10-K for the year ended June 30, 2015, and in prior reports pursuant to the Securities Exchange Act of 1934, as amended and the Securities Act of 1933, as amended.

SHOULD ANY OF THE FOREGOING RISKS OR UNCERTAINTIES MATERIALIZE, OR SHOULD THE UNDERLYING ASSUMPTIONS OF OUR BUSINESS PROVE INCORRECT, ACTUAL RESULTS MAY DIFFER SIGNIFICANTLY FROM THOSE ANTICIPATED, BELIEVED, ESTIMATED, EXPECTED, INTENDED OR PLANNED.

Our primary exploration efforts are in the African country of Madagascar, where a new government has been in place since early 2014.

Any adverse developments to the political situation in Madagascar could have a material effect on the Company's business, results of operations and financial condition. Democratic elections in Madagascar occurred toward the end of 2013 as planned by the elections calendar jointly established between the UN and the Elections Commission. To date, the Company has not experienced any disruptions or been placed under any constraints in our exploration efforts due to the political situation in Madagascar. Depending on future actions taken by the newly elected government, or any future government, the Company's business operations could be impacted.

The newly elected President was inaugurated on January 25, 2014 and the lower house of Parliament took office in February 2014. A government reshuffle occurred in early 2015, with the naming of a new Prime Minister on January 14, 2015. Ministers composing the new government were named on January 25, 2015. On May 26, 2015, the Parliament voted to impeach the President on the grounds that he had violated the Constitution. The High Constitutional Court invalidated the claim, declaring the accusation unfounded. The President, the Government and the Parliament continue to operate as before.

The Company is actively monitoring the political climate in Madagascar and continues to hold meetings with representatives of the government and the Ministry attached to the Presidency in charge of Mining. The transformation or amendment of exploration and research mining permits within the country continues to be suspended, including the transfer and status of the Molo Graphite Project permit. Additionally, this permit expired in 2011 and has not been renewed despite our efforts to do so. The Company has continued to pay taxes and administrative fees in Madagascar with respect to our mining permits including the permit relating to the Molo Graphite Project (although such permit is not in the Company's name). These payments have been acknowledged and accepted by the Madagascar government. Further, in order to advance the Molo Graphite Project, the current permit will need to be converted into an exploration permit in the name of the Company or one of its subsidiaries. The Company cannot provide any assurance as to the timing of the receipt of the required permits.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

ITEM 5. OTHER INFORMATION

None.

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
